

THE SECRET TO BE WEALTHY

(Long-Term Wealth Building)

By Joseph McBrennan, Editor, Wealth Legacy Advisory

Too many people think, "If only I had \$1,000,000 (pick any number), I'd be set."

This is the first secret to sustained wealth and long-term wealth building. It doesn't matter how much money you manage to acquire. If you're not prepared to be wealthy, you'll soon fail.

Two statistical examples show you what I mean:

- In excess of 70% of ALL lottery winners end up broke. A greater number of these end up worse off than when they "hit it big."
- In addition, Bloomberg recently reported that a professional athlete's advocacy group sited the statistic that within two years after ending their professional careers, 78% of former pro athletes end up divorced, jobless or bankrupt.

The flip side of this secret is that UNEARNED WEALTH can be a curse.

Imagine stumbling onto millions, yet losing your family.

All the money in the world isn't worth it.

The world is full of people with money, yet they have no life and no wealth.

The lesson is clear. The secret is clear.

You must prepare to be wealthy.

Conclusion: Don't live in a dream, but analyze your financial position immediately.
